

Technical advantages **Piccolo 11/230 V**

Solid and mature constructions, wear resistant materials, outstanding roller and drive technology, excellent workmanship: With our machines, you crush oats, barley, wheat, maize, spelt etc. The safe, comfortable working and the simple operation are convincing. From the appealing design through the compact, space-saving type of construction to the exemplary ease of maintenance, we leave no desire unfulfilled.

- Wear resistant, surface hardened rollers with a profile with maximum grip by our self-developed "Taschenschliff" (flat gearing)
- Both rollers driven against each other by cog wheels – therefore running without slipping.
- Safe when running empty - no contact between the rollers
- Adjustable crushing gap with standard adjustment
- Through the fixed crushing gap, even at maximum throughput, the rollers do not move – consistent crushing quality
- Robust motors and drivers, matched to the throughput of the machine
- Blockage-preventing feed system with magnetic metal-removers as standard
- Foreign body remover for e.g. stones
- Hinged hopper for a simple access to the rollers
- Amperemeter for optimal adjustment of the inflow
- Motor overload protection with male connector
- Maintenance free, oversized bearings for the rollers - quiet operation
- Torsion resistant steel construction, using galvanised steel as well as other forms of corrosion protection
- Separate wall mounting bracket
- Available extras: Roller scraper

Technical specifications:

Characteristics

Engine

Piccolo 11 230V

1,1 kW 230 V 1-phase

Hopper capacity in litre (kg)

ca. 11 (20)

with [additional hopper](#) (total)

ca. 110 (60)

Size in cm (W x H x L)

58 x 40 x 33

Inlet/Outlet height in cm

with [arch stand](#)

127,5/86

with [special arch stand](#)

135/86

Weight in kg

62

Possible crushable goods

Oats, barley, wheat, rye, maize

Crushing gap in mm

ca. 0 - 2,5

Roller surface

Surface-hardened heat-treatable steel

Roller profile

"Taschenschliff" (flat gearing)

- Foreign body remover 
- Magnetic metal-removers 
- Amperemeter
-

Equipment details

Scope of supply

- Grain crusher
- Wall mounting bracket
- 13mm socket wrench
- 6mm Allen wrench
- Adjustment wrench
- Manual
